(4) _____	_____	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

☐ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

Applicants would like to discuss the Examiner's basis for alleging, in the Advisory Action, that Templin teaches "the collaborating host sends the data to the desination in such a way as to make the destination host believe the data is from the source host" in view of col. 8, lines 39-47 which states:

"The inventive interchange of packets is illustrated in FIG. 5 . . . Trusted host A 150 generated s a packet [A->C] 501 destined for untrusted host C 160. The gateway B 300 intercepts the packet 501, and recognizes the packet 501 as a foreign packet. The packet 501 is consumed, and the gateway B generates a new packet [B->C] 502. Host C, believing it is communicating with a "host," generates a packet [C->B] 503 in response, and never learns of the existence of host A 150. Hence, the gateway is secure." (Emphasis added)

An interview was conducted on the above-identified application on _____

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01). This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
